Profile

For 4.5 years, I've focused on mastering UI development, blending form with function. My journey led me into UX design for 1.5 years, where I honed my empathy for users, crafting digital experiences that resonate. Now, diving fully into UX, I'm eager to blend my technical skills and design intuition to create captivating user journeys that truly connect.

Skills

Design Tools
Figma, Sketch, After Effects

UI/UX Design
User reasearch, Wireframing & Prototype, Information Architecture, Usability Testing, High FidelityPrototypes, Persona creation, User flow, Task flow

Web Development
HTML5, CSS3, Responsive Design, Bootstrap

Integrated development environment
Visual studio code and Sublime

Version control
Git, Tortoise SVN

Programming Languages
Javascript, Typescript

Front-End Technologies
Angular

Soft Skills
Time managemant, Critical Thinking, Adaptability, Creativity, Attention to Detail

Certificates

UI/UX Designer 🔗
from Upgrad

Education

Bachelors of Engineering (Computer Science and Engineering),
Visvesvaraya Technological University
Bangalore, India

UX Projects

Nexycle (Revolutionizing Pickup and Recycling Solutions) 🔗
- Objective: Develop a system for efficient garbage pickup scheduling.
- Challenge: Optimizing garbage pickup services.
- Goal: Promote eco-friendly behaviors and reduce environmental impact.
- Method: Based on user-selected time slots.
- Solution Approach: Allow users to select preferred time slots for collection.

DesignDrape (Personalized Ethnic Wear App) 🔗
- Objective: Address the challenge of connecting users with bespoke ethnic wear and skilled designers through a seamless user experience.
- Primary Goal: Design an intuitive UI/UX interface that facilitates easy navigation and Connect users to Designers across country.
- Simplify: Discovery, customization, and ordering process.
- Product Range: Navigate through a diverse range of ethnic wear products (sarees, lehengas, salwar suits, kurtis, and more).

ParkZen (Your stress free parking solution) 🔗
- Objective: Address the challenge of finding and reserving parking spots for various vehicle types through a seamless user experience.
- Primary Goal: Design an intuitive UI/UX interface that facilitates easy navigation and parking reservations.
- Simplify: Search, reservation, and payment process for parking spots.
- Vehicle Categories: Accommodate a diverse range of vehicles (cars, motorcycles, bicycles, and more).

Professional Experience

Core Abilities and Responsibilities

- Utilize version control systems like Git for code management and collaboration.
- Design and develop web applications and websites using HTML, CSS, and JavaScript.
- Translate design mockups into interactive experiences, write clean, modular, and well-documented code, and conduct thorough testing and debugging.
- Collaborate with senior developers to optimize performance and functionality, ensure responsive and cross-browser compatible designs, and integrate user feedback into iterative design improvements.
- Apply UX principles to create intuitive and engaging user interfaces, use prototyping tools like Figma, and conduct user testing to enhance user experience.
- Develop wireframes, prototypes, and high-fidelity mockups to effectively communicate design ideas and interactions to stakeholders and development teams.
- Stay updated with the latest UI/UX trends, tools, and technologies to continuously improve design processes and outcomes.

Work Experience & Projects

UI Developer, Htc Global Services
July 2021 – July 2022 | BENGALURU, India

Associate Professional, Sutherland Healthcare solutions
March 2019 – September 2020 | Hyderabad, India

Associate Professional, Green Technosoft
July 2017 – January 2019 | Hyderabad, India
